REQUEST FOR APPLICATIONS
Special Research Grants for Aquaculture
Research Program

FUNDING YEAR: Fiscal Year 2022
APPLICATION DEADLINE: June 3, 2022
ANTICIPATED FUNDING: $1,936,000
AVERAGE AWARD RANGE: $50,000 - $300,000
FUNDING OPPORTUNITY NUMBER: USDA-NIFA-SRGP-009105
ASSISTANCE LISTING NUMBER: 10.200
LETTER OF INTENT DEADLINE: Not Required
INITIAL ANNOUNCEMENT
National Institute of Food and Agriculture
United States Department of Agriculture

Assistance Listing: The Special Research Grants for Aquaculture Research program is listed in the Assistance Listings under number 10.200.

Advancing Diversity, Equity, Inclusion, and Accessibility. NIFA recognizes research, education, and extension efforts will have the greatest impacts when equity is grounded in the programs. NIFA is committed to enhancing diversity, equity, inclusion, and accessibility of programs and encourages individuals, institutions, and organizations from underserved communities to apply to funding opportunities as lead, co-lead, or subaward recipient(s), and to engage as leaders in the peer panel review process to support the development of strong networks and collaborations. NIFA encourages applications that engage diverse communities and have broad impacts through research, education, extension, and integrated activities to address current and future challenges.

Stakeholder Input. The National Institute of Food and Agriculture (NIFA) seeks comments on all request for applications (RFAs) so it can deliver programs efficiently, effectively, with integrity, and with a focus on customer service. NIFA considers comments, to the extent possible when developing RFAs and use comments to help meet the requirements of Section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). Applicants may submit written comments to Policy@usda.gov (email is for comments only). Please use the following subject line: Response to the Special Research Grants for Aquaculture Research program RFA.

Centers of Excellence. Applicants are encouraged to visit the NIFA’s Centers of Excellence (COE) for information on COE designation process, including COE criteria, and a list of programs offering COE opportunities. A recording of COE outreach and COE implementation webinars are also available.
EXECUTIVE SUMMARY

NIFA requests applications for the Special Research Grants for Aquaculture Research competitive grants program for fiscal year (FY) 2022. The amount available for grants in FY2022 is approximately $1.936 million. **If this program receives appropriated funds in FY2023, fundable projects identified in this competition may be supported using FY2023 funds.** In this case, a separate RFA may not be issued for the FY2023 funds. This program funds applied aquaculture research projects to address issues related to: 1) Genetics of commercial aquaculture species; 2) Critical disease issues impacting commercial aquaculture species; 3) Design of environmentally and economically sustainable commercial aquaculture production systems; 4) Development of climate resilient technologies, production systems, and/or management strategies for commercial aquaculture species; or 5) Economic research for increasing commercial aquaculture profitability.

This notice identifies the objectives for Special Research Grants for Aquaculture Research Program projects, deadlines, funding information, eligibility criteria for projects and applicants, and application forms and associated instructions.

PART I. FUNDING OPPORTUNITY DESCRIPTION

A. Legislative Authority
The authority for the Special Research Grants for Aquaculture Research competitive grants program is contained in the Competitive, Special, and Facilities Research Grant Act, Pub. L. No. 89-106, as amended (7 USC 3157 (c)(1)(A)).

B. Purpose and Priorities
The purpose of the Special Research Grants for Aquaculture Research program (Assistance Listing Number 10.200) is to support the development of an environmentally and economically sustainable aquaculture industry in the United States by generating new, science-based information and technology to address industry constraints. Applied research is needed to develop practical solutions that will facilitate growth and remove limitations to expansion of the United States aquaculture industry. Results of projects supported by this program are intended to help improve the profitability of the United States aquaculture industry, reduce the 13-billion-dollar United States seafood trade deficit, increase domestic food security, expand markets for United States-produced products, and provide more jobs for rural and coastal America.

For the FY2022 Special Research Grants for Aquaculture Research program, NIFA is soliciting applied aquaculture research applications. Applications must:

1. Directly address major constraints to the United States aquaculture industry; and
2. Focus on one or more of the following Program Area Priorities:
   a. Genetics of commercial aquaculture species;
   b. Critical disease issues impacting commercial aquaculture species;
   c. Design of environmentally and economically sustainable commercial aquaculture production systems;
   d. Development of climate resilient technologies, production systems, and/or management strategies for commercial aquaculture species; or
   e. Economic research for increasing commercial aquaculture profitability.

The Special Research Grants for Aquaculture Research program is aligned with the following USDA Strategic Goals:

Strategic Goal 1: Combat Climate Change to Support America’s Working Lands, Natural Resources and Communities

Strategic Goal 2: Ensure America’s Agricultural System is Equitable, Resilient, and Prosperous

Strategic Goal 3: Foster an Equitable and Competitive Marketplace for All Agricultural Producers

The USDA Strategic Plan may be found at:

Other key information:
1. This program is limited to applied research.
2. Applications must include United States aquaculture industry involvement. This can include, but is not limited to, a United States aquaculture producer as a co-project director or partner or assembling an industry advisory committee (e.g., a farmer’s...
advisory committee for the project that can include producer-based organizations, feed manufacturers, animal health industry, etc.).

3. Applications that engage and incorporate historically underserved groups including tribal organizations are especially encouraged.

4. Applicants must provide a budgeted plan to release results to the public in a timely manner. This plan must clearly state how the research results or technology developed will be transferred to end-users outside of direct, scientific peers.

5. Applicants must clearly describe how their specific research project will increase United States aquaculture production or profitability in the short or medium-term (1-5 years after the grant ends).

6. For the critical disease Program Area Priority, proposals that focus on pathogens that pose a risk to humans or human food safety (vs. those that affect the health of an aquaculture species) are outside the scope of this program and will not be accepted or considered for review.

7. Applicants must include statistical power analyses, when appropriate, and describe the experimental design, experimental unit, replication, and sample size for each experimental group.

8. Applicants are strongly encouraged to review the American Fisheries Society (AFS) document, Guidelines for the Use of Fishes in Research (2014), when developing applications for submission to this RFA.

9. The inclusion of students actively engaged in research projects providing hands-on, experiential learning and training opportunities is strongly encouraged. Actively engaged students should be encouraged to contribute to presentations, articles, posters, and other expressions of scholarship.

Pursuit, application, and preservation of traditional ecological knowledge is an acceptable method to pursue the objectives of this program. NIFA welcomes (but does not require) applicants to work with the Extension Foundation for the development and delivery of content for the public and for Extension professionals nationwide through Connect Extension, or a National Cooperative Extension Project website. NIFA encourages outreach through virtual methods.

**Global Engagement.** NIFA supports global engagement that advances U.S. agricultural goals. NIFA recognizes that collaboration with international partners may be necessary to attain the agency's goals for U.S. agriculture, promote global competence of our nation’s future agricultural workforce, and promote safe and nutritious food security in a growing world. Therefore, although application to this RFA is limited to eligible U.S. institutions, applicants may collaborate with international partners, to include subcontracts to international partners or other institutions. Applications must clearly demonstrate benefits to the U.S.

PART II. AWARD INFORMATION

A. Available Funding
The anticipated amount available for the Special Research Grants Program for Aquaculture Research in FY2022 is $1.936 million. If this program receives appropriated funds in FY2023, fundable projects identified in this competition may be supported using FY2023 funds. In this case, a separate RFA may not be issued for the FY2023 funds.

For FY 2022, this program will accept applications for standard research projects with a budget of up to $300,000 (total project, not per year) and a maximum duration of 2 years. The start date of a 2-year project funded with funds appropriated in FY 2022 appropriations, must be before October 1, 2022. (i.e., These projects must be initiated in the federal fiscal year in which the funds were appropriated). Recipients may be eligible for a no-cost extension for a third year, but no carryover or extension is permitted for any project beyond 3 years from the project start date (any unexpended funds must be returned to the U.S. Treasury).

If fundable projects identified in this competition are supported with FY 2023 appropriations, applicants will be notified, and additional documentation may be requested. The start date of the projects funded with funds appropriated in FY 2023 will be adjusted to a date in FY 2023.

The Automated Standard Application for Payments, operated by the Department of Treasury, Bureau of Fiscal Service, is the designated payment system for awards resulting from this RFA.

B. Application Restrictions
NIFA will evaluate applications using the criteria described in Part V of this RFA. Applications for FY 2022 is limited to the following application types:

1. New application: This is a project application that has not been previously submitted to the Special Research Grants for Aquaculture Research program. We will review all new applications to ensure they meet administrative requirements and all applications will be competitively evaluated by a review panel using criteria and selection processes described in Part V of this RFA and are subject to the due dates herein (see Appendix III for definition).

2. Resubmitted application: This is an application that had previously been submitted to the Special Research Grants for Aquaculture Research program, but not funded. Resubmitted applications must include the responses to the previous review panel summary and are subject to the same criteria and due dates herein. Resubmitted applicants must enter the NIFA-assigned proposal number of the previously submitted application in the Federal Field (Field 4) on the application form (see Appendix III for definition).

C. Project and Grant Types
All projects MUST focus on applied aquaculture research. All proposed projects MUST directly address major constraints to the United States aquaculture industry and focus on one or more of the Program Area Priorities (listed above in section I.B.). Duplicate or multiple submissions are not permitted.

Standard project proposals: The intent is to fund applied research that addresses program priorities with a maximum award of $300,000 and maximum duration of 2 years.
D. Ethical Conduct of Funded Projects

In accordance with sections 2, 3, and 8 of 2 CFR Part 422, institutions that conduct USDA-funded extramural research must foster an atmosphere conducive to research integrity, bear primary responsibility for prevention and detection of research misconduct, and maintain and effectively communicate and train their staff regarding policies and procedures. In the event an application to NIFA results in an award, the Authorized Representative (AR) assures, through acceptance of the award that the institution will comply with the above requirements. Award recipients must, upon request, make available to NIFA the policies, procedures, and documentation to support the conduct of the training. See Responsible and Ethical Conduct of Research for further information.
PART III. ELIGIBILITY INFORMATION

A. Eligibility Requirements

Applications may be submitted by State agricultural experiment stations, all colleges and universities, other research institutions and organizations, Federal agencies, private organizations or corporations, and individuals for the purpose of conducting research, extension, or education activities to facilitate or expand promising breakthroughs in areas of the food and agricultural sciences of importance to the United States. Failure to meet an eligibility criterion by the application deadline may result in the application being excluded from consideration or, even though an application may be reviewed, will preclude NIFA from making an award.

Applicants for the Special Research Grants Program for Aquaculture Research must meet all the requirements discussed in this RFA. Failure to meet the eligibility criteria by the application deadline may result in exclusion from consideration or, preclude NIFA from making an award. For those new to Federal financial assistance, NIFA’s Grants Overview provides highly recommended information about grants and other resources to help understand the Federal awards process.

Duplicate or Multiple Submissions – duplicate or multiple submissions is not allowed. NIFA will disqualify both applications if an applicant submits duplicate or multiple submissions. For those new to Federal financial assistance, NIFA’s Grants Overview provides highly recommended information about grants and other resources to help understand the Federal awards process.

B. Cost Sharing or Matching

No Match Required - The Special Research Grants Program for Aquaculture Research has NO matching requirement. NIFA will not factor matching resources into the review process as an evaluation criterion.

C. Centers of Excellence

Pursuant to Section 7214 of the Agricultural Act of 2014 (Pub. L. 113-79), NIFA will recognize and prioritize COE applicants that carry out research, extension, and education activities that relate to the food and agricultural sciences. A COE is composed of one or more of the following entities that provide financial or in-kind support to the COE.

1. State agricultural experiment stations.
2. Colleges and universities.
3. University research foundations.
4. Other research institutions and organizations.
5. Federal agencies.
7. Private organizations, foundations, or corporations.
8. Individuals; or
9. Any group consisting of two or more of the entities described in (1) through (8).
PART IV. APPLICATION AND SUBMISSION

A. Method of Application
Applicants must apply to this RFA electronically; no other method or response is accepted. The electronic application for this RFA and additional resources are available on Grants.gov and Grants 101. Table 3 provides instructions on how to obtain an electronic application. Part III of the NIFA Grants Application Guide contains detailed information regarding the Grants.gov registration process. The NIFA Grants Application Guide is contained in the specific funding opportunity package or a sample of the guide can be found here. When applying for a NIFA award, it is important to reference the version of the guide that is included in the specific funding opportunity application package.

B. Content and Form of the Application
The application guide is part of the corresponding application package for this RFA. The RFA overrides the application guide if there is a discrepancy between the two documents. NIFA will accept subsequent submissions to an application until the application deadline. However, applicants that do not meet the application requirements, to include partial applications, risk being excluded from NIFA’s review. NIFA will assign a proposal number to all applications that
meet the requirements of this RFA. Applicants must refer to the proposal number when corresponding with NIFA. **Table 5** outlines other key instructions for applicants.

**SF 424 R&R Cover Sheet.** See Part V of the [Application Guide](https://grants.gov) for the required certifications and assurances.

**SF 424 R&R Project/Performance Site Location(s).** See Part V of the Application Guide.

**R&R Other Project Information Form.** See Part V of the Application Guide.

1. Field 7. Project Summary (PS)/Abstract. The PS must show how the project goals align with the priorities of the Special Research Grants for Aquaculture Research program. See Part V of the Application Guide for instructions and suggested templates.

2. Field 8. Project Narrative (PN). The PN must not exceed 15 1.5 spaced pages of written text including figures and tables (the font size for tables should be no smaller than 11 points, Times New Roman). The page limits outlined here ensure fair and equitable competition. Appendices to the PN (e.g., letters of support) are allowed if they are directly germane to the proposed project and will not count against the page limit. Do not add appendices to circumvent the page limit. The PN must include all the following:
   a. Introduction;
      i. Include a clear statement of the long-term goal(s) of the proposed project.
      ii. Summarize the body of knowledge that substantiates the need for the proposed project.
iii. Include preliminary data/information pertinent to the proposed project. All works cited should be referenced.

b. Rational and significance;
   i. Present the rationale behind the proposed project and reasons for performing the work at the proposing institution;
   ii. Describe the specific relationship of the proposed project to the Program Area Priorities, and state which of the five Program Area Priorities the proposal is primarily addressing. Applications that do not address at least one Program Area Priority will not be reviewed;
   iii. Clearly document the expected improvement in and sustainability of the United States aquaculture industry;
   iv. Estimate the magnitude of the issues and their relevance to stakeholders and to ongoing state-federal food and agricultural research, education, and extension programs; and
   v. Document the role of stakeholders and indicate the amount of industry participation in problem identification, planning, implementation, and evaluation as appropriate.

c. Objectives;

d. Approach;
   i. The activities proposed or problems being addressed must be clearly stated and the approaches applied must be clearly described. Specifically, this section must include:
      1) A description of the activities proposed and the sequence in which the activities are to be performed;
      2) A description of the activities proposed and the sequence in which the activities are to be performed;
      3) Methods to be used in carrying out the proposed project, including the feasibility of the methods and the role and qualification of project partner(s);
      4) Expected outcomes;
      5) Means by which results will be analyzed, assessed, or interpreted;
      6) How results or products will be used;
      7) Plans to communicate results to stakeholders and the public (e.g., extension, technology transfer, education activities, workshops) that articulate how the research results will be transferred to end-users outside of direct scientific peers;
      8) How this specific research project will advance aquaculture production in the United States in the short or medium term (1-5 years after the grant ends);
      9) How the impacts will be evaluated and reported (a logic model is suggested to accomplish this);
      10) If undergraduate, graduate students, and post-doctoral research fellows are included, how they will be actively engaged in the research;
      11) Pitfalls that may be encountered;
      12) A full explanation of any materials, procedures, situations, or activities related to the project that may be hazardous to personnel, along with an
outline or precautions to be exercised to avoid or mitigate the effects of such hazards and;

e. Project timeline;
f. Cooperation and institutional involvement;
g. Data management plan (DMP);
h. Logic model (recommended);
i. Centers of Excellence Justification (optional); Applicants requesting consideration of COE status must include their justification at the end of their Project Narratives and within the page limits provided for the project narratives; and
j. Response to previous review: The response to previous review must not exceed 1 1.5 spaced page. This does not count towards the page limit for the PN.

**R&R Senior/Key Person Profile (Expanded).** See Part V of the Application Guide for profile requirements, details about the biographical sketch, and suggested support templates.

**R&R Personal Data.** This information is voluntary and is not a precondition of award (see Part V of the Application Guide).

**R&R Budget.** See Part V of the Application Guide.

1. Indirect costs (IDC) – See Part IV § C of this RFA for funding restrictions regarding indirect cost, and Part V of the Application Guide for additional information.

**Data Management Plan.** A DMP is required for this program. Applicants should clearly articulate how the project director (PD) and co-PDs plan to manage and disseminate the data generated by the project. The DMP will be considered during the merit review process (see Part V § B of this RFA, NIFA’s Data Management Plan). If you need help in preparing a data management plan or have questions about what constitutes a data management plan for this role (including questions about data privacy, etc.), please contact the NIFA program contacts listed at the end of this RFA.

**Supplemental Information Form.** See Part V of the Application Guide.

1. Field 2. Program to which the applicant is applying. Enter the program name (Special Research Grants program for Aquaculture Research) and the program code (AQUA). Accurate entry is critical.

**Representations Regarding Felony Conviction and Tax Delinquent Status for Corporate Applicants.** This is required for corporate applicants. See Part VI § 2 of the Application Guide for a description of the term, “corporation.”

**C. Funding Restrictions**

**Indirect Cost (IDC) not to exceed 30 percent of Total Federal Funds Awarded (TFFA) of the recipient.** Section 1462(a) and (c) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA) limits IDC for the overall award to 30 percent of Total Federal Funds Awarded (TFFA) under a research, education, or extension grant. The
maximum IDC rate allowed under the award is determined by calculating the amount of IDC using:

1. the sum of an institution’s negotiated indirect cost rate and the indirect cost rate charged by sub-awardees, if any; or
2. 30 percent of TFFA.

The maximum allowable IDC rate under the award, including the IDC charged by the sub-awardee(s), if any, is the lesser of the two rates.

If the result of number one is the lesser of the two rates, the grant recipient is allowed to charge the negotiated IDC rate on the prime award and the sub-award(s), if any. Any sub-awards would be subject to the sub-awardee’s negotiated IDC rate. The sub-awardee may charge its negotiated IDC rate on its portion of the award, provided the sum of the IDC rate charged under the award by the prime awardee and the sub-awardee(s) does not exceed 30 percent of the TFFA.

If the result of number two is the lesser of the two rates, then the maximum IDC rate allowed for the overall award, including any sub-award(s), is limited to 30 percent of the TFFA. That is, the IDC of the prime awardee plus the sum of the IDC charged by the sub-awardee(s), if any, may not exceed 30 percent of the TFFA.

In the event of an award, the prime awardee is responsible for ensuring the maximum indirect cost allowed for the award is not exceeded when combining IDC for the Federal portion (i.e., prime and sub-awardee(s)) and any applicable cost-sharing (see 7 CFR 3430.52(b)). Amounts exceeding the maximum allowable IDC are considered unallowable. See sections 408 and 410 of 2 CFR 200.

Successful applicants must not use grant funds awarded under the authority of this RFA to renovate or refurbish research, education, or extension space; purchase or install fixed equipment in such space; or to plan, repair, rehabilitate, acquire, or construct buildings or facilities.
PART V. APPLICATION REVIEW REQUIREMENTS

A. NIFA’s Evaluation Process
NIFA evaluates each application in a two-part process. First, we screen each application to ensure that it meets the administrative requirements set forth in this RFA. All administrative requirements must be met in order for the application to proceed to the next level of review. Second, a scientific peer-review process will be used to technically evaluate applications that have met the administrative requirements using a review panel (see NIFA Peer Review Process).

Scientific Peer Review Process:
NIFA selects reviewers for the review panel based upon their training and experience in relevant scientific, extension, or education fields, taking into account the following factors:

1. the level of relevant formal scientific, technical education, or extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education, or extension activities.
2. the need to include experts from various areas of specialization within relevant scientific, education, or extension fields.
3. the need to include other experts (e.g., producers, range or forest managers/operators, researchers, public health practitioners, educators, consumers, and commercial reviews) who can assess relevance of the applications to targeted audiences and to program needs.
4. the need to include experts from a variety of organizational types (e.g., colleges, universities, industry, state and Federal agencies, and private profit and non-profit organizations) and geographic locations.
5. the need to maintain a balanced composition with regard to minority and female representation and an equitable age distribution; and
6. the need to include reviewers who can judge the effective usefulness of each application to producers and the general public.

After each peer review panel has completed its deliberations, the responsible program staff of NIFA will recommend that your project is either approved for support from currently available funds or declined due to insufficient funds or unfavorable review.

NIFA reserves the right to negotiate with the PD and/or the submitting organization or institution regarding project revisions (e.g., reductions in the scope of work, funding level, period, or method of support) prior to recommending any project for funding.

After the review process has been completed, NIFA sends copies of reviews, not including the identity of reviewers, and a summary (if applicable) of the review panel comments to the PD.

Conflicts of interest. NIFA takes extreme care to prevent any actual or perceived conflicts of interest that may influence the review or evaluation (see NIFA Peer Review Process for Competitive Grant Applications).
B. Evaluation Criteria
A reviewer’s written evaluation entails two levels of assessment. First, the reviewer summarizes how well the application addressed each evaluation criterion. After the application has been assessed for strengths and weaknesses of each criterion, the reviewer then evaluates the overall likelihood that the project will have significant outcome and impact. These written reviews are used to begin panel discussions with other reviewers serving on the peer review panel. Through these discussions, peer review panelists come to consensus on the final rating and ranking of proposals. For a complete description of NIFA’s peer review process see NIFA Peer Review Process for Competitive Grant Applications.

NIFA will use the following criteria (weighted equally) to evaluate this RFA:

1. Proposal Relevance and Effectiveness— This ascertains if the proposed work: is applied research directed toward at least one of the five Program Area Priorities identified in this RFA; directly addresses major constraints that currently limit development and progress of domestic aquaculture; clearly states how the research results or technology will be transferred to end-users outside of direct scientific peers; and how it will accelerate United States aquaculture industry development, by increasing production or profitability, in the short- or medium-term (1-5 years after the grant ends).

2. Technical/Scientific Merit— This assesses: whether the approach is technically sound and innovative; whether there are clear project goals and objectives; if preliminary data support the demonstration of feasibility; if the methods are appropriate and the proposal includes all components necessary to achieve goals and objectives; if the proposal includes a concrete, unambiguous, specific desired outcome for domestic aquaculture and has a high probability of achieving that outcome; if the proposal includes a way to objectively determine its success at achieving its outcomes, and if the proposal includes a detailed description of plans for data management and retention.

3. Overall Qualifications of Applicants— This ascertains whether the applicant and others on the team possess: the necessary education, experience, and training; a demonstrated record of successful technology transfer to end-users outside of direct scientific peers; and the facilities and resources to accomplish the project. This includes applicant’s record of achievement with previous funding, as well as the qualifications of project partners. If the proposal includes the use of outside consultants not yet identified, this criterion includes how clearly the selection factors for the outside consultants are set out, and the expected qualifications of the consultants based on those selection factors.

For proposals reviewed meritoriously, all budget and budget justification documents will be analyzed by program and grants management staff for appropriateness of the costs proposed.

C. Centers of Excellence
In addition to evaluating applicants using the criterion listed in Part V § B of this RFA, NIFA will use the COE standards described in this RFA to evaluate applicants that rank highly meritorious and requested to be considered as a COE. In instances where applicants are found to be equally meritorious with the application of a non-COE applicant, NIFA will prioritize the COE applicant meeting the COE criteria. NIFA will effectively use the COE prioritization as a “tie breaker.” Applicants that rank highly meritorious but who did not request consideration as a COE or who are not deemed to have met the COE standards may still receive funding.
Applicants that meet the COE requirements will have the COE designation in their notice of award. Entities recognized as COE will maintain that distinction for the duration of their period of performance or as identified in the terms and conditions of that award.

D. **Organizational Management Information**
Applicants must submit specific management information relating to an applicant prior to an award and update the information as needed. Applicants may only have to update their information if they had previously provided the information under this or another NIFA program. NIFA provides the requisite forms during the pre-award process. Although an applicant may be eligible for award under this program, there are factors that may exclude an applicant from receiving federal financial and nonfinancial assistance and benefits under this program (e.g., debarment or suspension of an individual, or a determination that an applicant is not responsible).

E. **Application Disposition**
An application may be withdrawn at any time before a final funding decision is made regarding the application. Each application that is not selected for funding, including those that are withdrawn, will be retained by the NIFA Aquaculture Research Program for a period of three years.
PART VI. AWARD ADMINISTRATION

A. General
Within the limit of funds authorized, the NIFA awarding official will make grants to responsible and eligible applicants whose applications are judged most meritorious under the procedures set forth in this RFA. The date specified by the NIFA awarding official as the effective date of the grant must be no later than September 30 of the federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. The project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by NIFA under this RFA may be used only for the purpose for which they are granted in accordance with the approved application and budget, regulations, terms and conditions of the award, applicable federal cost principles, USDA assistance regulations, and NIFA General Awards Administration Provisions, 7 CFR Part 3430, subparts A through E. A recipient of a grant under this subsection shall submit to the Secretary on an annual basis a report describing the results of the research, extension, or education activity and the merit of the results.

Award Notice. The award document will provide pertinent instructions and information as described in 2 CFR 200.211 (see NIFA’s Terms and Conditions).

B. Administrative and National Policy Requirements
Several federal statutes and regulations apply to grant applications and the projects outlined in this RFA (some are listed here: Federal Regulations). Unless specifically noted by statute or award-specific requirements, NIFA Policy Guide applies to all NIFA awards.

C. Expected Program Outputs and Reporting Requirements
The output and reporting requirements are included in the award terms and conditions (see https://nifa.usda.gov/terms-and-conditions for information about NIFA award terms). If there are any program- or award-specific award terms, they will be identified in the award.
PART VII. OTHER INFORMATION

A. Use of Funds and Changes in Budget

Delegation of fiscal responsibility. Unless the terms and conditions of the award state otherwise, awardees may not in whole or in part delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of award funds.

Changes in Budget or Project Plans. In accordance with 2 CFR 200.308, awardees must request prior approval from NIFA for the following program or budget-related reasons (the awardee is subject to the terms and conditions identified in the award):

1. Change in the scope or the objective of the project or program without prior written approval (even if there is no associated budget revision requiring).
2. Change in a key person specified in the application or the federal award.
3. Disengagement from the project for more than three months, or a 25 percent reduction in time devoted to the project.
4. Inclusion of costs that require prior approval in accordance with 2 CFR 200 Subpart E (Cost Principles), or 45 CFR Part 75 Appendix IX, (Principles for Determining Costs Applicable to Research and Development under Awards and Contracts with Hospitals), or 48 CFR, unless waived by the federal awarding agency,
5. 48 CFR Part 31, Contract Cost Principles and Procedures;
6. Transfer of funds budgeted for participant support costs to other categories of expense (2 CFR 200.456 Participant support costs);
7. Sub-awarding, transferring or contracting out of any work under a federal award, including fixed amount sub-awards (see 2 CFR 200.333, Fixed Amount Sub-awards), unless described in the application and funded in the approved federal awards. This provision does not apply to the acquisition of supplies, material, equipment, or general support services.
8. Changes in the approved cost-sharing or matching provided by the non-federal entity; and
9. The need for additional federal funds to complete the project.

B. Confidential Aspects of Applications and Awards

When an application results in an award, it becomes a part of NIFA transaction records, which are available to the public. Information that the Secretary of Agriculture determines to be confidential, privileged, or proprietary in nature will be held in confidence to the extent permitted by law. Therefore, applicants should clearly mark any information within the application they wish to have considered as confidential, privileged, or proprietary. NIFA will retain a copy of an application that does not result in an award for three years. Such an application will be released only with the consent of the applicant or to the extent required by law. An applicant may withdraw at any time prior to the final action thereon.

C. Regulatory Information

This program is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the collection of information requirements contained in this notice have been approved under OMB Document No. 0524-0039.
