

PROPELLING U.S. AGRICULTURE FORWARD

MEETING ADMINISTRATION PRIORITIES WITH CREATIVE SOLUTIONS

DIVERSITY, EQUITY, INCLUSION AND ACCESSIBILITY

NIFA is answering USDA's call to take bold, historic action to reduce barriers to access, advance opportunity for underserved communities, and root out generations of systemic racism and discrimination. We are continuing to strengthen programs that support Minority-serving Institutions and are ensuring that NIFA is staffed with a diverse workforce committed to its customers.

CLIMATE CHANGE

NIFA recognizes that the agriculture and forestry sectors and rural communities must act now to fight climate change. We are building on already strong progress to integrate climate change into programs and services as we work to support farmers, ranchers, forest landowners, partners and rural communities.

NUTRITION SECURITY

NIFA supports nutrition security, defined as having consistent access, availability and affordability of foods and beverages that promote well-being and prevent disease, particularly among our nation's most socially disadvantaged populations.

BUILDING BACK THE ECONOMY

NIFA is committed to creating more and better markets for producers and consumers alike. We are helping build a fair and resilient food system of the future through enhanced opportunities in urban and organic agriculture, market development and small business innovation research.
