# **Biology, Natural Resources, and Environment (BNRE): Soil Health A1401 Program Overview**

# Purpose and Priorities

- The goal of the Soil Health A 1401 program area priority is to support research projects that will contribute to:
  - Foundational and applied research to advance scientific **understanding of soil physical and biogeochemical processes and interactions**;
  - Assessment, development and adoption of models, decision support tools and new climate-smart management/conservation practices that will lead to improving or maintaining soil health and productivity while maintaining or improving environmental health in a changing climate and sustainability of our natural resource base;

## Purpose and Priorities

- Applications may address one or more of the following:
  - Evaluation of the effects of management practices on:
    - Soil microbial community function and their contribution to healthy soils
    - Carbon sequestration,
    - Mitigating greenhouse gas emissions and/or sustainable, climate-resilient agroecosystems;

## Purpose and Priorities

- Applications may address one or more of the following:
  - Assessment and/or development of innovative approaches, tools and technologies that enhance the understanding and/or management of the physical and biogeochemical processes that contribute to soil health.

## Eligibility

- Colleges or universities (including junior colleges offering associate degrees or higher)
- State agricultural experiment stations
- National laboratories
- Federal agencies
- Private organizations or corporations
- Other research institutions or foundations
- Individuals who are U.S. citizens, nationals, or permanent residents
- A consortium of two or more eligible entities.

**Biology, Natural Resources, and  
Environment (BNRE): Water Quantity  
and Quality A1411 Program Overview**

# Purpose and Priorities

RFA Page 57

## *The Why:*

- The U.S. is committed to the proper management of agricultural practices and improved efficiency of agricultural water uses to protect water quality and increase water and food security, and improve resilience of agricultural and forest ecosystems to climate change (U.S. Global Water Strategy Refresh 2022).
- USDA-NIFA will provide competitive support to improve water science, management and technologies, water conservation and water use efficiency; promote common data exchange formats and access to data for decision-making, improve forecasting and model water related systems, and promote technology adoption and behavior change by producers, land managers, and decision makers.

# Purpose and Priorities

RFA Page 58

## *The How:*

- Practically, USDA-NIFA seeks applications to:
  - a. Reduce the freshwater demand (both groundwater and surface water) for irrigation and the nutrient demand for maximum crop production by substituting the use of other technologies, management practices and/or other water sources (recycled wastewater, brackish groundwater, agricultural return flow and produced water from industry) while retaining appropriate soil health (managed salinity, adequate infiltration, proper application and use of soil amendments, such as fertilizers, manure and biochar) and eliminating accelerated erosion from farm fields, and;
  - b. Protect water quality of surface and groundwater systems through improved nutrient management, improved pesticide management, and reduced nutrient, pesticide, pathogen, and contaminants of environmental concern (CEC) loads to surface or groundwater.

# Program Overview

# Purpose and Priorities

RFA Page 61-61

## Seeks to strengthen one or more of the following:

- New and/or improved strategies to develop **bio-based products that improve product functionality, increase potential revenues and/or reduce cost over incumbent products**; this includes addressing supply chain challenges for the production systems for feedstock/germplasm improvement, product formulation or end-user market demand;
- Strategies and approaches for scalable biomass systems that provide **beneficial ecosystem services**, such as improved water availability and quality, improved life cycle emissions, nutrient use reduction, or wildlife and pollinator habitat enhancements; and/or
- Strategies to **alleviate technical, and economic barriers** leading to adoption resulting in improved consumer attitudes toward the bioeconomy and strengthening the rural economy through development of new bioproducts and employment opportunities.

# Application Details and Documents

# Application Details

RFA Page 60-61

- RFA is available online at:

<https://www.nifa.usda.gov/grants/funding-opportunities/agriculture-food-research-initiative-foundational-applied-science>

- **Application Deadline:** September 7<sup>th</sup>, 2023 by 5 p.m. (Eastern Time)
  - Submitted through Grants.gov
- Program Code: A1414
- Maximum funding per award: \$1,000,000

# Key Documents

RFA Page 120

Key components of your Application:

- Project Summary/Abstract
- Project Narrative
- Bibliography/Reference List
- Data Management Plan
- Other Documents (See RFA and [NIFA Grants Application Guide](#))

## Key Documents (contd.)

- Project Narrative is **18 page limit** and will be strictly enforced. One additional page (maximum) is allowed for a response to reviewers for resubmissions only.
  - **Single spacing**
  - 12 point Times New Roman font
  - Includes text, figures and tables
- Within 18 pages describe:
  - Introduction
  - Rationale and Significance
  - Approach, including Objectives, Methods, Timetable
  - [Additional requirements for Integrated projects – please see the PDF “AFRI-FAS-RFA-Additional-Information-for-Part-IV-C-FY23” on the [AFRI RFA Resources](#) page
- Applications exceeding the page limitation will be returned without review

# Data Management Plan

RFA Page 120

- Investigators must provide detailed (up to 2 pages) business and management plans including:
  - Expected data type
  - Data format
  - Data storage and preservation
  - Data sharing, protection and public access
  - Roles and responsibilities
- Please also review: [nifa.usda.gov/resource/data-management-plan-nifa-funded-research-projects](https://nifa.usda.gov/resource/data-management-plan-nifa-funded-research-projects)

# Application Submission

RFA Page 118

- NIFA only accepts **electronic** submission of applications.
- NIFA Grants Application Guide available:  
[nifa.usda.gov/resource/nifa-grantsgov-application-guide](https://nifa.usda.gov/resource/nifa-grantsgov-application-guide)
- Application documents **must be in Portable Document Format (PDF)** to be accepted by NIFA, including your narrative and budget justifications.
  - Grants.gov may allow other formats, but NIFA does ***not***
  - Do not use third-party PDF builders

National Institute of Food and Agriculture  
U.S. DEPARTMENT OF AGRICULTURE

---

# Proposal Evaluation Process

# Evaluation Process

RFA Page 122

Proposals are assigned for review to at least 3 reviewers with expertise in the proposed topic.

Reviewers will produce individual reviews of each proposal, evaluating the strengths and weaknesses.

These written reviews are used to begin panel discussions with other reviewers serving on the peer-review panel.

Through these discussions, peer-review panelists come to consensus on the final rating and ranking of proposals.

# Evaluation Criteria

RFA Page 123

- Detailed evaluation criteria for each project type, grant type, and centers of excellence are found in the “AFRI Review Criteria” PDF in the attachments list on the [AFRI RFA Resources](#) page.
  - For A1414 Integrated projects, this includes evaluation of:
    - Merit of the Application for Science Research, Education, and/or Extension
    - Qualifications of Project Personnel, Adequacy of Facilities, and Project Management
    - Project Relevance
- Please see the the AFRI Review Criteria PDF mentioned above for additional detail for each of these categories.

# Timeline of Competitive Programs

**1-2 months**

- Request for Applications (RFA) release
- Proposal writing and planning
- **Proposals due**

**2-3 months**

- Proposal under peer review
- Proposal funding notifications

**1-2 months**

- Awards are finalized and made

On average, a competitive program takes about 3-5 months from the proposal due date to an award being made to an institution.

**We will keep you updated as much as possible. We appreciate your patience!**

# Program Overview

# Purpose and Priorities

RFA Page #63

This program area priority calls for research projects that focus on improvement of ecosystem health and output of ecosystem services in managed production systems (croplands, forests, and rangelands) that are currently under stress or at risk from climate change, pests, pathogens, invasive plants, and increased environmental pressures. This priority area calls for applied research that will advance scientific understanding of health, functions, processes and management of sustainable agroecosystems.

# Purpose and Priorities

RFA Page #63

Applications must address one of the following:

- a. New approaches that significantly increase ecosystem health and resilience, along with the output or value of more than one ecosystem service, compared with the current management system for the region.
- b. Improving connection of ecosystem health to managed system productivity, functionality, socioeconomic viability, biodiversity, sustainability and/or resilience.

# Eligibility

RFA Page #114

- a) State Agricultural Experiment Station;
- b) colleges and universities (including junior colleges offering associate degrees or higher);
- c) university research foundations;
- d) other research institutions and organizations;
- e) Federal agencies;
- f) national laboratories;
- g) private organizations or corporations;
- h) individuals who are U.S. citizens, nationals, or permanent residents; and
- i) any group consisting of two or more entities identified in a) through h).

# Program Overview

## Purpose and Priorities

RFA Page #65

This program area priority is soliciting applications to fund a single Standard Research Grant to better understand, measure, and track how NIFA's research, education, extension, and workforce development investments in clean energy, climate change, food and nutrition security and water programming impact underserved communities. This program is particularly focused on secondary, or indirect, community-level social benefits and impacts. Novel and effective approaches to tackle this challenge will be required.

# Purpose and Priorities

RFA Page #65

Proposals are required to address all the following:

- a) Developing models that leverage and complement existing geospatial approaches to environmental justice and describe multiple dimensions of the indirect and long-term effects of investments on underserved communities.
- b) Incorporating input and design principles extensively and meaningfully from underserved and indigenous communities at all stages of model development and execution.

# Eligibility

# **Crosscutting: Critical Agricultural Research & Extension (CARE) Program Overview**

# Purpose and Priorities

RFA Page 90

## ***The Why:***

- This program area addresses critical challenges and opportunities that research and extension, together, can address to improve our nation's agricultural and food systems. Despite prior investments in basic and applied research, critical problems continue to impede the efficient production of agriculturally-important plants and animals, for producing safe and nutritious foods, and to meet environmental challenges for agriculture.
- These problems may be local, regional, or national, and may call for work focused on one or more scientific disciplines. However, all need immediate attention to meet producer and consumer needs. Finding and implementing solutions to these critical problems require partnership and close coordination among researchers, extension experts, and practitioners in food and agricultural enterprises.

# Purpose and Priorities

RFA Page 90

## *The How:*

- Funded projects are expected to produce results that lead to practices, tools, and technologies that are rapidly adopted by end-users. Projects based on Indigenous Traditional Ecological knowledge are appropriate for this program area priority.
- This program area priority is designed to support integrated activities based on rigorous research combined with effective extension and involvement of stakeholders to develop and rapidly apply new knowledge or practices resulting in improved well-being of the people, communities, plants, and animals involved in, and affected by, agriculture and food-production systems.

# Purpose and Priorities

RFA Pages 90-91

- Focus on a clear, time-sensitive, stakeholder-identified need or problem for agriculture;
- Explain the magnitude of the problem and the rationale for targeting it;
- Describe a meaningful approach for blending research and extension expertise and other outreach and implementation approaches throughout the project to address principal objectives;
- Provide evidence that the project is aligned to the **Why** and **How** listed above;
- State expected solutions or improvements and how these will be assessed and measured;
- Address the potential cost of a proposed solution and describe how it can be scaled to be sustainable in the short term and long term; and
- Explain how the project will strengthen agricultural and food-production systems and how results will be adopted or applied at a local, regional, or national level

# Eligibility

- Eligible applicants for Integrated Projects include:
  - a) colleges and universities;
  - b) 1994 Land-Grant Institutions; and
  - c) Hispanic-serving agricultural colleges and universities (see NIFA's Hispanic-Serving Agricultural Colleges and Universities page).
- For item a) under Integrated Projects, the terms "college" and "university" mean an educational institution in any state which
  - a) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate;
  - b) is legally authorized within such state to provide a program of education beyond secondary education;
  - c) provides an educational program for which a bachelor's degree or any other higher degree is awarded;
  - d) is a public or other nonprofit institution; and
  - e) is accredited by a nationally recognized accrediting agency or association.

# Project and Grant Type Description

RFA pages 60, 89, 91 ; and  
[https://www.nifa.usda.gov/sites/default/files/resource/  
AFRI-Review-Criteria.pdf](https://www.nifa.usda.gov/sites/default/files/resource/AFRI-Review-Criteria.pdf) page 6

- All applications must adhere to the requirements in Part IV of the AFRI Foundational and Applied Sciences RFA. The CARE program accepts only integrated proposals for program-funded or FASE-funded standard and new investigator grants. An integrated proposal for CARE must include the two foci: Research and outreach/Extension only.
- No focus can have less than 1/3 of the total budget committed to the project. Food and Agricultural Science Enhancement (FASE) Grants are designed to help institutions develop competitive projects and to attract new scientists and educators into careers in high-priority areas of national need in agriculture, food, and environmental sciences.
- FASE Applications focus on Minority Serving Institutions, Small and mid-sized universities and colleges, and EPSCOR (low federal investments) states listed on the NIFA web site.

# Application Details

- RFA is available online at:
  - [https://www.nifa.usda.gov/sites/default/files/2023-02/FY23-AFRI-FAS-RFA-508\\_0.pdf](https://www.nifa.usda.gov/sites/default/files/2023-02/FY23-AFRI-FAS-RFA-508_0.pdf)
- **Application Deadline:** Thursday, September 14, 2023 (5:00 p.m. Eastern Time)
  - Submitted through Grants.gov
- Total funding available in FY 2023: ~\$5,000,000
- Program Code: A1701
- Maximum funding per award: \$300,000

# Key Documents

RFA Page 120

## **Additional Information**

# Use CRIS to Find Funded Awards

The screenshot shows the home page of the Current Research Information System (CRIS) website. At the top left is the USDA logo and the text "United States Department of Agriculture National Institute of Food and Agriculture". A navigation bar contains links for "Home", "About CRIS", "Search Menu", "Reports", "Help", and "Contact Us". On the left side, there is a "Search CRIS" section with links for "Assisted Search", "Professional Search", and "Search Pending Projects", followed by an "Other Functions" section with links for "NIFA Admin Functions" and "Manual of Classification". The main content area features the heading "Current Research Information System" with a "More" link and a paragraph of introductory text. On the right side, there is a "What's New in CRIS ?" section with a list of topics including Avian Influenza, Biofuels/Bioenergy, Food Safety (Ala-Mic), Food Safety (Min-Wyo), Mad Cow/TSE/Rltd, Nanotechnology, Obesity/Weight Control, Soybean Rust, and Tribal Education. At the bottom of the main content area, there is a paragraph of instructions on how to navigate the website.

# Program Overview

# Climate Hubs Partnership Program Area Priority Description

Supports projects that provide *effective, translatable* and *scalable* approaches to address climate change through **regional partnerships** including the USDA Climate Hubs and Extension (e.g., the Cooperative Extension Service)

# USDA Climate Hubs

- **Unique collaboration across USDA agencies**
  - 10 Regional Hubs led by Agricultural Research Service (ARS), Forest Service (USFS), and the Natural Resources Conservation Service (NRCS)
- **Vision:** Robust and **healthy agricultural production and natural resources** under increasing **climate variability and change**
- **Mission:** Develop and deliver **science-based, region-specific information and technology** to agriculture and natural resource managers to...
  - Science and data syntheses, tool and technology development, outreach and engagement

**Further Information:**  
[climatehubs.usda.gov](https://climatehubs.usda.gov)

# Intent of the Program

## **Regional partnerships including the USDA Climate Hubs and Extension**

1. Net-zero emissions agriculture;
2. Working lands adapted to climate change;
3. A diverse workforce that can effectively communicate about climate change with a variety of stakeholders and can incorporate climate considerations into managing working lands; and
4. Climate justice including equity in opportunities and burden-sharing

## **Broad emphasis areas include:**

- Training on climate-smart food systems, including effects of climate on nutrition security and components of nutrient density, food safety and food waste

# Inaugural Year Overview (FY 2021)

- 6 projects funded for \$9 million
- 9 of the regional Climate Hubs were included in the partnership submissions
  - 8 included in awards
- 5 awards led by academic institutions and 1 led by the Caribbean Climate Hub
- 3 Extension projects and 3 integrated Extension and Education projects

**Funded Projects**

# Data Management and Sharing Reality

- Sharing data often speeds up the advancement of science
- The reality is that a small % of published work includes shared data, even if it is promised in Data Management Plans (DMPs)
- In 2020, PLOS 1 reported that out of 21,000 journal articles that included data-sharing plans fewer than 21% provided links to the repository storing the data

# NIFA's Perspectives of Data Management

- Data Management Plans are required for all Research, Education, and Extension Projects
- Limited to two pages
- Only one DMP submitted per project
- Clearly articulate how the PD and co-PD's plan to manage and disseminate data generated by the project
- Must include the following five components:

# 1. Expected Data Type

- Description (e.g., digital, non-digital)
- How it is generated
- Is it primary data or metadata

## Research

- Lab work
- Field work
- Surveys

## Extension

- Outreach materials
- # of stakeholders reached
- # of activities
- Assessment questionnaires

## Education

- # of students enrolled/participated
- Degrees granted
- Curriculum
- Training products

## 2. Data Format

- Goal: data should be readily accessible and usable
- Use “community-recognized” standards
- Indicate the formats that will be used (conforming to public platforms when appropriate)
- Must contain enough information to allow independent use of the data

### 3. Data Storage and Preservation

- Must be stored in a safe environment with adequate measures for long-term preservation
- Describe plans for storing and preserving data during and after the project
- Specify data repositories
- How much data will be preserved and what is the planned retention period?
- What are the strategies and contingency plans to avoid data loss, degradation or damage

## 4. Data Sharing, Protection, and Public Access

- What are the sharing procedures during and after the grant
- Include a statement of the plans to protect confidentially, personal privacy, proprietary interest, and intellectual property rights
- Clearly outline restrictions due to copyright, confidentiality, appropriate credit, disclaimers, or conditions for use.

## 5. Roles and Responsibilities

- Who ensures DMP implementation
- What is the contingency plan if there are personnel changes
- What resources are needed to develop and implement the DMP

# Implementation Expectations & Monitoring

- NIFA expects that data management updates be included in annual and final reports
- Many programs are developing their best practices for monitoring
- Need for better outreach on data management expectations

### Maize-GAMER: GO Annotations, Methods, Evaluation and Review

maize-GAMER is a collaborative project to improve the status of gene functional annotation in maize (\*Zea mays\*). The project has three main areas of focus, namely \* Design a pipeline for the functional annotation of maize genes. \* Use manually curated test data to evaluate the annotations and generate a best subset of annotations for use \* Design a user friendly review system for the community to provide feedback and endorsements of the annotations

## Public Plans

Public DMPs are plans created using the DMPTool service and shared publicly by their owners. They are not vetted for quality, completeness, or adherence to funder guidelines.

# Non-Discrimination Statement

<https://www.usda.gov/non-discrimination-statement>

- In accordance with federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs, are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.
- Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.
- To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax (202) 690-7442; or (3) email: [program.intake@usda.gov](mailto:program.intake@usda.gov).
- USDA is an equal opportunity provider, employer and lender.
