Addition of numerous new facets and data elements in result set, such as the Multistate Project Number, Cooperating States, Cooperating Counties, and Latest Award Amount:

Search these terms…

◦You can search using the Boolean operators, AND, OR, NOT. ◦These operators (or joiners) must be capitalized.

◦You can search using the wildcards (*) and (?). ◦Example: Bio* - will return results containing words that begin with "Bio", such as Biology, Biophysics, etc.

◦Example: *ment - will return results containing words that end with "ment", such as equipment, shipment, etc.

◦Example: br??d - will return results containing words such as breed, brood, bread, brand, etc.

◦You can search using quotes. ◦Example: "corn based polymers" - returns results only when all three of those words are found in that exact order.

◦Without quotes, the AND operator is assumed by default. Example: corn based polymers - with no quotes, is the same as searching - corn AND based AND polymers
